

### MOUNTING INSTRUCTIONS

These locks or latches are designed to be mounted on surfaces up to 2 inches thick. The cam bars are adjustable to a maximum of 2 inches from the mounting surface. Cam bar options include lengths of 15/16", 1-1/2" and 3"

- 1). Cut out the template below. Place on mounting surface at desired location.
- 2). First drill a 1-1/4 inch hole as indicated on the template.
- 3). Second, drill a 1-1/8 inch hole as indicated on the template.
- 4). Third, drill two 13/16 inch holes
- 5). Then drill four holes as indicated for #8 type mounting screws.
- 6). Using a saw, cut out the remaining outline of the template
- 7). Insert lock or latch through the hole in the surface and mount using #8 type mounting screws.
- 8). Assemble cam bar and check proper adjustment. Tighten set screw on cam bar.

**Note: For continued ease of operation, periodically apply a lock cylinder lubricant.**
